SECTION 3- HEALTH HAZARD DATA:

Effects of Overexposure: Inhalation of vapors may cause pulmonary edema, circulatory system collapse, damage to upper respiratory system, collapse. Inhalation of vapors may cause coughing and difficult breathing. Liquid may cause severe burns to skin and eyes.

Effects of Ingestion: Ingestion is harmful and may be fatal. May cause severe burning to mouth and stomach. May cause nausea and vomiting.

Medical Conditions Generally Aggravated By Exposure: None identified.

Routes of Entry: Ingestion, inhalation, skin contact and eye contact.

SECTION 4- FIRST AID MEASURES

Emergency and First Aid Procedures: CALL A PHYSICIAN. If swallowed do not induce vomiting; If conscious, give water, milk or milk of magnesia.

If inhaled remove to fresh air. If not breathing give artificial respiration. If breathing is difficult give oxygen. In case of contact immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before re-use.

Toxicity test results and safety and health effects are based on the solute.

NFPA 704M Rating: 3-0-0

Flammable Limits: Upper - N/A% Lower- N/A%

Fire Extinguishing Media: Use extinguishing media appropriate for surrounding fire.

Special Fire Fighting Procedures: Firefighters should wear proper protective equipment and self-contained (positive pressure if available) breathing apparatus with full-face piece. Move exposed containers from fire area, if it can be done without risk. Use water to keep exposed containers cool; do not get water inside containers.

Unusual Fire & Explosion Hazards: Closed containers exposed to heat may explode.

Toxic Gases Produced: Hydrogen chloride, Hydrogen gas.

SECTION 6- ACCIDENTAL RELEASE MEASURES

Steps to be taken in event of spill or discharge: Wear self-contained breathing apparatus and full protective clothing. Stop leak if you can do so without risk. Ventilate area. Neutralize spill with soda ash or lime. With clean shovel, carefully place material into clean, dry container and cover; remove from area. Flush spill area with water.

SECTION 7- HANDLING AND STORAGE

Special Precautions: Keep container tightly closed. Store on corrosion-proof area.

SECTION 8- EXPOSURE CONTROL/PERSONAL PROTECTION

Ventilation: Use general or local exhaust ventilation to meet TLV requirements.

Respiratory Protection: Respiratory required if airborne concentration exceeds TLU. Pt concentrations up to 100 ppm, a chemical cartridge respirator with acid cartridge is recommended. Above this level, a self-contained breathing apparatus is recommended.

Eye/Skin Protection: Safety goggles and face shield, uniform, protective suit and acid-resistant gloves are recommended.
