Countdown Timer – Program and Operation (For 220V model)

Model 144AX-220 utilizes a timer with two timing cycles:
- Program 1 controls the exhaust time.
- Program 2 controls the total time for cleaning and exhaust. This program duration must always be longer than program 1.

The timer will display the set time for Program 2 by default. When the UVO Cleaner® is operating, the display will indicate the remaining process time and count down to zero.
